

# PAINT and PAINT STRIPERS

Odeys is a distributor of Fleet paints and paint strippers. Our paint is brighter and will outlast the other guys.

## Fastline Paint

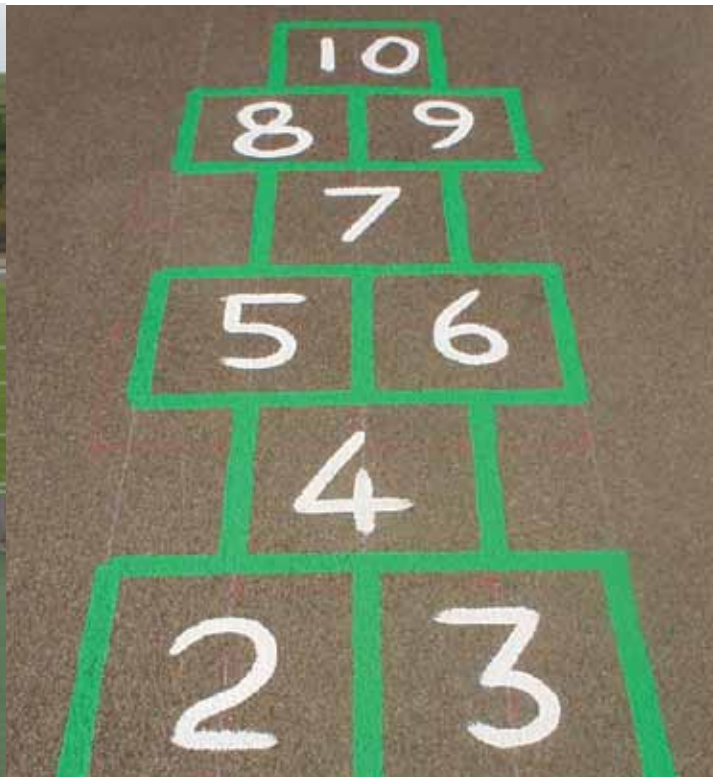

Fastline paint is bright, rain-resistant line-marking material. The dilution rates range from 3:1 through to 6:1. Supplied in three gallon jugs.

## Linestripe Paint

Linestripe paint is eco-friendly and rain resistant. The dilution rate ranges from 1:1 to 3:1. Supplied in five gallon jugs.

**Our paint works on natural-grass and synthetic fields, as well as hard surfaces like parking lots, tennis courts and playgrounds. Available in white, yellow, blue, red and custom colors.**

**We can do your project or coach you through it!**

# PAINT and PAINT STRIPERS

## Kombi and BeamRider Paint Stripers

The **Kombi** (pictured below) provides crisp, well-defined lines and is electrically powered with an eight-hour battery.

It's easy to use — just add paint and water at your chosen dilution rate, select line width requirements from 1.5 to 4 inches. Turn on the switch and begin marking.

After you have finished painting, flush the system with water from the rear tank and recharge the machine so it's ready for the next use. Paint can stay in the machine's reserve tank until the next application.

The **BeamRider** combines the superior **Kombi** technology with a laser beam for absolutely straight lines.

Compared to the manually painted line at left, the **BeamRider** laser line looks pretty good!

This laser head comes with the **BeamRider** set. Come on, you'll get to play with **LASERS**.

The **Kombi** machine will make your life so much easier.

**We can do your project or coach you through it!**
