

# SPORTS FIELD PRODUCTS

Odeys Sports Field Products are used on little league, high school, college and professional fields throughout the midwest.

## Odeys Infield Conditioner

Odeys Infield Conditioner improves drainage, manages moisture and reduces compaction to provide a consistent and safe playing surface. Odeys Infield Conditioner should be incorporated into the infield playing surface.

## Odeys Premium Infield Topdressing

Also available in red!

Odeys Premium Infield Topdressing is a consistently sized particle, making it the perfect infield topdressing to manage moisture and provide a consistent and safe playing surface. Odeys Premium Infield Topdressing should be applied as a surface coating on the infield playing surface.

## Odeys Drying Agent

Odeys Drying Agent is a fine-sized particle used to quickly remove excess water from the infield and provide a safe playing surface. This product is safe to leave on the field indefinitely and will not harden.

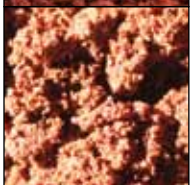

## Odeys Soil & Turf Conditioner

Odeys Soil & Turf Conditioner reduces compaction and enhances oxygen-, water- and nutrient-holding capacities in the soil to provide an ideal growing environment. The conditioner should be incorporated into the soil during construction or worked in following aeration.

## Odeys Professional Red Mound Clay

Odeys Professional Red Mound Clay is a deep red, high-density screened clay used for the construction and renovation of pitching and home plate areas from amateur to professional levels. It provides a firm yet pliable playing surface, which reduces maintenance and ensures consistently safe footing in this high-wear area.

## Odeys Premium Red Infield Mix

Odeys Premium Red Infield Mix is a deep red, high-clay-content soil ideal for the skinned infield area. It has a higher sand content than the mound clay, providing a greater water percolation rate.

## Odeys Warning Track Mix

Now available in black!

Odeys Warning Track Mix is a deep red warning track material. The combination of coarse- and fine-sized particles provides a firm yet manageable warning track surface.

**We can do your project or coach you through it!**
